UNIVERSITY of IAȘI

Researchers' Night UAIC 2026

Event organized under the aegis of the

Researchers' Night 2026

IASI, Sept 25th, 2026

The “Alexandru Ioan Cuza” University of Iași continues in 2026 the tradition of organizing **Researchers' Night**, an annual event dedicated to bringing science and researchers closer to the general public. Held at the **Palas Park in Iași**, the event brings together researchers from different scientific fields and audiences of all ages through experiments, demonstrations, hands-on activities and direct dialogue.

The history of Researchers' Night at UAIC dates back to **2013**, when the Faculty of Physics became involved in the European Researchers' Night initiative and coordinated events in Romania through successive European-funded projects. Since then, the event has developed into an established annual meeting between the research community and the public in Iași, reaching its **15th edition in 2026**.

The 2026 edition continues this long-standing commitment to science communication, public engagement and encouraging young people to discover research and scientific careers. **The event is organized in collaboration with the Balkan Physical Union and the Romanian Physical Society, under the auspices of Researchers' Night.**
